Defense Health Agency (DHA) - FY 2014 Procurement Forecast

March 2014

Public Law 100-656, the Business Opportunity Development Reform Act of 1988, amended the Small Business Act to emphasize acquisition planning. The law requires agencies to compile and make available projections of contracting opportunities that small businesses (including minority, women-owned, HUBZone, veteran-owned, and service-disabled veteran-owned) may be able to perform. <u>All projected procurements are subject to revision or cancellation.</u> Final decisions on the extent of competition, small business participation, estimated value, or any aspect of the procurement action will not be made until each procurement is initiated. The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the Government to purchase the desired products and services.
